PRESS RELEASE FOR IMMEDIATE RELEASE

DYNAMIC ANNOUNCES OPENING OF CUSTOMER SUPPORT, INSTALLATION & TESTING CENTRE

Oshawa, Ontario, CANADA, August 4th, 2011

Dynamic Fuel Systems Inc. (TSX VENTURE: DYA) ("Dynamic" or the "Corporation"), announces the opening of its Customer Support, Installation and Testing Centre.

Dynamic expands its operations to include a New Customer Support, Installation and Testing Centre located at 730 Construction Court, Zeeland Michigan, USA. The Zeeland site was selected as it makes the most sense in the support of the Corporations on-going field trials, future sales and development of new products for additional industries.

The positive results being achieved through the on-going field trials of its advanced hydrogen technology product the "HydraGen™", the proximity to current Dealer relationships in Michigan, the commercialization of the HydraGen™ and the recent joint hydrogen Technology Feasibility Study with Heart Transverter, has resulted in the expansion of the Corporation.

The customer support centers (CSC) primary role will be to support the roll out of the Corporations flag ship product "HydraGen™" unit for the class 8 transportation industry. The CSC is over 4000 sq. feet, has two truck bays, a complete work shop, test equipment and offices. The CSC will be a catalyst in supporting the HydraGen™ products continuous improvement program through the on-going field trials and ensuring that the Corporations core competencies continue to advance.

The expansion provides positive steps forward in realizing the Corporations goals of positioning itself as a market leader in the hydrogen technology industry within North America and abroad. The CSC will provide the required space and equipment to conduct Research & Development (R&D) and enhanced product development into additional industries, as announced previously with Heart Transverter S.A. (Heart) a "Universal Power Interface" which we see as a beneficial add on product working in conjunction with our flagship product the HydraGen™ offering a more complete "Green" solution for the worlds growing use of stationary generators along with numerous other applications yet to be explored

The CSC is critical in supporting our existing customer base, commercialization & sales roll out of the HydraGen™ unit for the transportation industry, however equally critical is the Corporations product development into additional industries, stated Mr. Grove Bennett President of Dynamic. Our commitment to provide enhanced HydraGen™

technology products for large consumers of Electrical Power and Diesel Fuel that lower emissions, increase engine life and reduce fuel consumption for Diesel Generators, Mining, Locomotive and Marine industries will benefit with the expansion. Dynamic plans for an open house later in the year, additional information will follow as plans are finalised.

About Dynamic Fuel Systems Inc.

Dynamic Fuel Systems Inc. is an Oshawa, Ontario; Canada based energy Sector Company engaged in the sales & marketing, manufacture, distribution, installation and support of a transportable hydrogen generator aftermarket product targeted for use in the heavy tractor trailer industry. Its flagship product, the HydraGen™, is a patent-pending aftermarket retrofit solution that provides performance enhancement by mixing hydrogen into a vehicle's intake air resulting in greater fuel efficiency supporting on and off road industries. The scientific and product development of the HydraGen(TM) is consistent with the Corporation's on-going commitment and dedication to improve the Corporation's current and future product offerings. Its business was founded in 2001.

The Corporation's emphasis during the on-going field trials to date was focused on delivering a HydraGen(TM) product that will survive the rigors of the transportation industry and to provide a reliable, sustainable & robust product to our end customers. The positive results of the on-going trials have permitted the Corporation to begin the commercialization of the HydraGen(TM) product. As our testing continues, the Corporation will provide specific and verifiable data confirming performance results, emission reductions and fuel savings.

The Corporation's relationship with companies with specific knowledge of gas calibration systems and the equipment required to run infield testing, continue to offer the Corporation opportunities for growth and continued development of the HydraGen(TM) product for additional industries.

Applications of our [new technology](#) are scheduled to commence testing on large diesel engines such as railroad, ocean, transit and equipment used in the oil and gas industries. This testing will provide an increase data base of diesel engine types and provide a design reference for application of the HydraGen(TM) product for those specific applications.

We are at the early stages of exploration in these fields and look forward to seeing the impact of the new HydraGen(TM) technology within these industries. Our focus is to provide solutions to power generating equipment with major companies, where the goal of a greener environment is at the forefront.

This release includes forward looking statements, which are based on certain assumptions and reflects management's current expectations. These forward looking statements are subject to a number of risks and uncertainties that could cause actual results or events to differ materially from current expectations. Some of these factors include: general global economic conditions; general industry and market conditions and growth rates; uncertainty as to whether our strategies and business plans will yield the expected benefits; increasing competition; availability and cost of capital; the ability to identify and develop and achieve commercial success for new products and technologies; the level of expenditures necessary to maintain and improve the quality of products and services; changes in technology; changes in laws and regulations, includes codes and standards, intellectual property rights, and tax matters; the uncertainty of the emerging hydrogen economy; including the hydrogen economy moving at a pace not anticipated; our ability to secure and maintain strategic relationships and distribution agreements. The

Corporation disclaims any intention or obligation to update or revise any forward looking statements, whether as a result of new information, future events or otherwise.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of the release.
